

Breast screening saves around 1,300 lives each year

- **New or persistent symptoms?**
- **Worried or unsure?**
- **Speak to your GP**

These symptoms don't always mean cancer, but should be checked.

- 01** Lump or swelling in the breast, chest or armpit
- 02** Skin changes, such as puckering or dimpling
- 03** Changes in size, shape or colour of breast
- 04** Nipple changes, inc. rash, crusting or discharge

Have you been invited for breast screening?
Book your appointment.

- **Know the signs**
- **Act early**
- **Talk to your GP**

Breast Cancer Awareness Month

October
