

How to use this template

Here's a ready-to-use email you can send to your team to inform them about the new cancer support available. Feel free to adapt it to your style or organisational culture.

Use these three simple steps:

1. Copy and paste the below email into your own email
2. Add any internal signposts (e.g. intranet link or HR contact)
3. Send it to your employees.

Subject: Introducing our cancer care benefit

Hello [TEAM],

I'm pleased to share an important new benefit now available to all of us. We know that cancer touches everyone in some way; whether personally, through family, or through the people we work alongside every day. As an organisation, we're committed to making sure our colleagues feel supported when it matters most.

We've partnered with Perci Health, a Macmillan-endorsed virtual cancer clinic, to offer expert-led cancer support whenever it's needed.

Perci Health provides personalised guidance around every aspect of cancer- from understanding personal risk and spotting concerns early, to getting support during treatment, recovery and return to work. It's available to anyone who is affected by cancer themselves, caring for someone with cancer, or simply wants trusted advice around cancer.

Through Perci Health, you can speak with cancer specialists, access reliable information, and get practical, compassionate support for whatever you may be facing.

How to access:

- 1 Log in to your employee benefits platform
- 2 Click on the *Perci Health* tile
- 3 Follow the steps to get started

I encourage you to explore this valuable resource, which can provide assistance during challenging times. If you have any questions or need further assistance, please feel free to reach out.

Thank you,

About Perci Health

Perci Health is the UK's largest virtual cancer clinic and the proud pioneer of Performance Oncology, a transformative new category of cancer care. Taking a proactive, clinically-led approach, Perci helps people prevent, prepare for, manage and recover from cancer.

Powered by proprietary technology and backed by leading oncologists and Macmillan Cancer Support, Perci combines multi-specialist, human-led care with smart technology to radically improve outcomes and reduce healthcare costs across the cancer pathway.

Whether preventing cancer, navigating treatment, or rebuilding life afterwards, Perci Health delivers evidence-based, whole-person care.
