Gynaecological cancer

Know the signs

- **New or persistent symptoms?**
- **Worried or unsure?**
- **Speak to your GP**

These symptoms don't always mean cancer, but should be checked.

- 01 Unusual vaginal bleeding or discharge
- 02 Persistent bloating, feeling full or nausea
- 03 Unexplained lower back, abdominal or pelvic pain

60 women are diagnosed every day

Most gynaecological cancers are more common in those over 50, though some types can affect younger people.

- **Know the signs**
- **Act early**
- **Talk to your GP**

Gynaecological Cancer Awareness Month

September
